Sports

Marie Fraley Connie Murray

Raiderettes Open Season December 6

The Appomattox County High School Raiderettes will open their 1977-78 basketball season against the Gretna Hens Tuesday night, December 6 at 6:30 p.m.

The Raiderettes are looking forward to another good year as three lettermen - Co-Captains Connie Murray (10 point average) and Marie Fraley (10.5 point average) and center Marlene Moore (7 point average and 7 rebounds per game) will be returning.

Joining these seniors from last year's team will be senior Roxie Martin and Roni Franklin and juniors, Susan Smith and Carol Beaty. New to the team will be juniors, Susan Godsey and Vanessa Smith; sophomore Annette Carter and Debbie Smith and freshman Susan Handy. All of these girls played on the Junior Varsity level last year and are progressing rapidly on the varsity level.

The Raiderettes will once again be small as they average about 5 feet, 5 inches. They will depend on speed, quickness and aggression to outplay their larger opponents. These qualities with experience, confidence, and a strong desire to win should help to a great deal. Most of these girls play other sports with each other - they know each other's strengths and weaknesses.

With good outside shooting a strong pressing defense, the Raiderettes team will be competitive.

The Raiderettes will be missing two key players from last year's team - Jan Stanley and Carolyn J. Smith. Both of these girls were key rebounders, averaging 14 points per game between them, and scorers, averaging 14 points a game between them, on a team that ended the season 9-7 in the district and 10-10 overall.

The Raiderettes are hoping to improve their fourth place finish of last year but the overall district race should be tight. There will be a lot of experience and height this year.

But - the Raiderettes will be competitive and ask for your support as in past years.

A Whole New Ballgame

By Tamara Nash

Head coach, Ray Archer and assistant coach, Coty Dickrson, have begun their second year as boys' varsity basketball coaches, but this year it's a whole new ballgame. Eleven of the 15 squad members are rookies. This year, there are only two seniors on the team. Definitely, the team lacks in height with the average at 5'9" but the players have tasted victory already this season and they like the feeling.

These are quality players in every position and the Raiders will carry a strong second string. The main objective for the team is to develop a good defense and balance their offense. The Raiders aren't expecting to be run over by anyone in the district.

For the Raiders, players will be: senior, Gerald Booker (Capt), 5'6"; Senior, Marvin Clark, 6'2; Junior, Joe Fraley (Capt.), 5'10"; Junior, Carl Watson, 5'10"; Junior, Tony Hancock, 5'10"; Junior, Tony Smith, 5'6"; Junior, Warren Austin, 5'10"; Junior, Arthur Haskins, 6'0"; Sophomore, Steve Cobb, 5'6"; Sophomore, William Hamlett, 5'5"; Sophomore, Stanley Megginson, 5'8"; Sophomore, Larry Kelso, 6'1"; Sophomore, Byron Roach, 5'6"; Freshman, Mike Campbell, 5'11"; Freshman, Shane Abernathy, 6'1".

And that, Appomattox, is the varsity basketball you need to support. Don't miss their season opener tonight, Dec. 1, against Buckingham in the ACHS gym.

Raiders Starting Anew

By Tony Mitchell
NEWS Sports Writer

APPOMATTOX - If second - year coach Ray Archer can get his young Appomattox Raiders to play the whole schedule like they do against the Seminole District powers, he'd be happy.

Coming in with a 4-16 overall record, the Raiders did have to their credit an upset win over Altavista (60-55), Liberty (43-39), and almost Rustburg which pulled off an (67-54) overtime victory.

Archer would also like to have some players left over from last season. Overall, Appomattox lost 12 of 15 players.

"I want to pick the five best defensive players we have and start them," said Archer." This year only two seniors will be on the team. We're hoping to develop a good defense and a balanced offensive attack. I'm hoping by tourney time, we'll have a good team."

Offensively, Appomattox needs to improve on its 51 point scoring average. Of the Raiders 1,020 points scored, almost 500 came from graduated players, Mitch Eggleston and Tommy Wingfield.

When Archer looks over the Raiders' fortunes, the guard spots and forward areas are both under heavy competition. Gridder Joe Fraley commands one guard outpost.

His greatest asset is "leadership" according to Archer. Fraley plays good defense and directs the Raiders offensive patterns.

The remaining frontcourt spot goes up between captain Gerald Booker and William Hamlett. Both are in the 5-5 range.

In the corners, Steve Watson (5-11), Larry Kelso, and Arthur Haskins are fighting for starting time. Watson (5-10, 146) has been selected by Archer for starting play. Haskins and Kelso are rated as tossups.

Marvin Clark (6-2, 170) has the starting nod at pivot.

"We have to be balanced offensively," said the Appomattox coach, "We don't have any single outstanding player. The lack of height will hurt us but our youth will be a good incentive for this season. There is some good talent here for the future."

Archer looks to Steve Cobb, Stanley Megginson, Byron Roach, and Tony Smith for added guard depth.

On the boards, Mike Campbell, Tony Hancock, Shane Abernathy, and Warren Austin fill out Raider uniforms that may see hardwood duty.

Fraley, also a captain, should be a vital key for Appomattox. It will be his responsibility to keep the young Raiders under control and the offense moving.

"I don't think any team will be able to run over us," said Archer. "The district as a whole will be extremely close."

"The pressure is on Nelson County to win but Brookville and Amherst are my two favorites. I believe our record can be better this season although we have many new faces. I'm hoping the program is turning in the right direction."

Archer, assisted by Coty Dickerson, faces the same problems as last season - lack of height and experience.

The youngsters need time developing with a major emphasis on defense. As the season grows, the Raiders should get better.

BASKETBALL SIGN-UP

There will be a sign-up for Little League Basketball this Saturday, Dec. 3, 1977, at the Middle School Bus Circle between the hours of 9:30 and 11:30 a.m. Anyone between the ages of 8 and 13 years old may sign up to play. Please bring the form below, filled out along with a $3.00 fee. If any questions, please call Billy Thompson or Jimmy Mayberry.

CO-CAPTAINS FOR THE RAIDER BASKETBALL TEAM this season are Gerald Booker, left and Joe Fraley.

Booker, a senior, is the son of Mr. and Mrs. Bobby Booker of Gladstone. Fraley, a junior, is the son of Mr. and Mrs. Charles Fraley of Appomattox.

VARSITY BOYS WILL OPEN SEASON TONIGHT

The Appomattox County High School Boys Varsity Basketball Team will open its season Thursday, tonight, when they take on Buckingham County High School here in the ACHS gym at 8 p.m. - one game only tonight.

The Varsity Girls Basketball Team will open its season Tuesday night when they take on Gretna High School girls at 6:30 p.m. at the ACHS gym. Varsity boys will play at 8 p.m. following the girls game.

Season tickets will be sold at the door Thursday or you can get your season ticket by contacting Jerry Robinson, Athletic Director, at the high school. Season tickets for adults will be $15.00 and $10.00 for students.

Fidelity's 5% Christmas Club... For the kind of Christmas you remember all your life.

Take a minute to think about some of the "special" Christmases in your life. Maybe the one when the kids got the puppy that was a member of the family for eighteen years. Or the Christmas reunion, when all the aunts and cousins and grandparents came—and you couldn't walk for kids and presents. Or the many times the two of you danced to the Bing Crosby Christmas album, all alone, by the light of the tree.

Special holidays, to dream of year after year. At Fidelity American Bank, nothing makes us happier than playing a part in somebody's "special" Christmas. Next year, let us be a part of yours. Simply open a Fidelity Christmas Club, add to it here and there during the year and, when it's paid up, get back all your money **and** 5% interest...just in time to make next Christmas as nice as all the ones in your dreams.

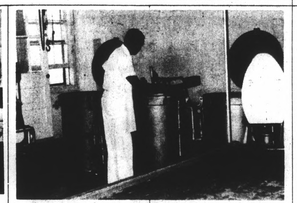
Thanksgiving Harvest

The kindergarten students at Appomattox Primary School enjoyed a special Thanksgiving snack last week. The students brought in foods that were enjoyed by children of long ago.

Pictured above are Terri Spiggle, Mary Helen McLaughlin, Vidal Megginson, Dean Nash, Tonya Moore, and Lioliza Forrest.



If I could help someone as I go along, if I could do some good, my life would not be in vain.

HELPFUL TIPS ON HAND TOOLS

If you're a Mr. Fixit around the house, your best friend can be your toolbox—but you have to be careful to use what's in it properly.

Here are some tips from the makers of Crescent tools to insure that do-it-yourself doesn't turn into do-it-to-yourself.

• For gripping small items, for electrical repairs and cutting wire, every tool kit should have a pair of all-purpose slip-joint pliers, and one or more solid joints—like a long needle nose for work in close quarters, or to retrieve a dropped nut!

• Avoid using a screwdriver as a pry bar. The hardening process to give tips maximum strength also makes them brittle and easily damaged. A damaged tip can slip, gouging adjacent wood—and you. A bit of soap on the threads will make screw turning easier and help prevent splitting the wood. A screwdriver with an oversize cushion grip handle, gives the best turning power.

• When working with an adjustable wrench or pliers, always apply pressure on the handle in the direction toward the adjustable jaw. Doing it the opposite way can cause it to slip—and skin your knuckles. Since plier jaws have teeth, a few overlapped turns of plastic tape at their point of contact on a shiny new pipe will prevent scratching.

A friend in the toolbox is a friend indeed!

MT. AIRY NEWS

I was glad when they said unto me, Let us go into the house of the Lord.

On the second Sunday, December 11, at 7 p.m. the Mt. Airy Usher Board are sponsoring a program. We are inviting you to come and bring a friend.

On the third Saturday, December 17th at 7 p.m. the Sunshine Singers of Mt. Airy Baptist Church are celebrating their 2nd anniversary. Rev. Deb Christian will be the guest speaker and Piney Hill Jr. Choir will render music. We are inviting you to come and worship with us.

JORDAN

On this Sunday afternoon at 3 o'clock p.m. The Golden Jubilee of Richmond, Virginia will be singing at the Jordan Baptist Church.

On Saturday, December 10 at 7:00 p.m. the Holiness Singers will be singing here for the benefit of the Holiness Singers.

PLEASE-EASY PIE

Here is a pie that makes people say, "More, please!" while you sit back and say, "My, that was easy!" Spicy Butterscotch Pie has all the luscious creaminess of a made-from-scratch filling, but because it uses Jell-O butterscotch instant pudding and pie filling there's no tedious cooking involved. All ingredients are beaten together in one bowl, then the filling is poured into a prepared crust and chilled. And for a change of pace, try a gingersnap crust.

SPICY BUTTERSCOTCH PIE

1 package (4-serving size) butterscotch instant pudding and pie filling
1 envelope whipped topping mix
2 tablespoons sugar
1/4 teaspoon pumpkin pie spice
1-3/4 cups milk
Gingersnap Crumb Crust

Combine pie filling mix, whipped topping mix, sugar, spice and milk in deep narrow-bottom bowl. Beat slowly at low speed of electric mixer until blended. Then beat at high speed until mixture thickens, about 4 minutes. Spoon into crust. Chill 3 hours. Garnish with prepared whipped topping and pecan halves or chopped pecans, if desired.

Gingersnap Crumb Crust. Combine 1-1/4 cups fine gingersnap crumbs and 1/4 cup sugar; mix in 1/4 cup melted butter or margarine. Press firmly on bottom and sides of 9-inch pie pan. Bake at 375° for 8 minutes. Cool.

Do It And Diet

Many experts on nutrition agree that it makes sense to substitute ingredients with lower calories and fat content, instead of giving up good-tasting dishes.

SMART SUBSTITUTION—Chicken hot dogs have less fat and fewer calories than regular hot dogs.

Take Weaver chicken hot dogs, for example. They offer an alternative to other hot dogs by containing 20 percent less fat and 20 fewer calories. In fact, they made a highly digestible food for the whole family because they're made from U.S.D.A. inspected for wholesomeness chicken.

Combined in tasty dishes (this versatile hot dog can be broiled, boiled, barbecued, fondued, mixed with vegetables and cheeses) or served alone, chicken hot dogs are perfect for people who want to cut calories and cholesterol without cutting out good flavor.

For a free booklet of recipes and serving suggestions prepared with Weaver Chicken Hot Dogs, write to: Weaver Cookbook Offer, Box 55, Ronks, Pennsylvania 17572.

AIR BEARING PLATFORM - A thin film of air nearly eliminates the sliding friction from a platform that can be used to move 1,000 pounds with finger-tip ease. Danny Hamlett and Andy Dalton, students at AMS, left to right, challenge the laws of gravity using an air bearing platform to glide effortlessly across the floor during GM's "Previews of Progress" presented Tuesday November 29th at Appomattox Middle School.

"Previews of Progress"

"The world we live in today is merely a stepping stone to tomorrow, with countless challenging questions left for scientists and engineers to answer."

That message of opportunity was presented to local students when General Motors national assembly program, Previews of Progress, appeared at Appomattox Middle School, Tuesday, November 29 at 2 p.m.

The non-commercial show seeks to encourage more student interest in science, engineering, and related vocational careers. It was presented live and in non-technical language by General Motors lecturers Dan Race and Kathy Duclos.

A highlight of the 45 minute program was a unique laser projector demonstration. A laser beam was used to translate the sounds we hear into visual patterns of light which danced on a screen before the audience.

The GM representatives also explained how sunlight can be converted into electrical energy by running a model of the Surveyor Lunar Roving Vehicles on solar cells. A 300-watt lamp, simulating the sun's rays, powered the Moon Rover across a corrugated table top surface.

Students also saw two fast-paced demonstrations which illustrate recent developments toward solving water and air pollution problems. First, the lecturers showed progress being made to clean up water used in an industrial process. They combined two common manufacturing pollutants to produce clean water and to eliminate the pollutants in one mutually beneficial operation.

Then students viewed a cutaway model of a catalytic converter, a device used to reduce automobile related exhaust pollutants. Based on extensive research and engineering, GM believes the catalytic converter is the best choice of alternatives at this time for meeting current federal requirements because it reduces emissions of pollutants while permitting improvements in fuel economy and driveability of automobiles.

A unique way to move heavy loads with little physical effort was illustrated by an "Air-bearing" platform. A small vacuum cleaner type motor provided a thin film of air under three large circular pads supporting the platform. This air-cushion reduced friction between the floor and the pads enabling finger-tip movement of the platform which carried about 200 pounds.

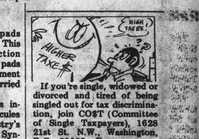
Two novel experiments involving "man-made" molecules showed modern chemistry's contribution to progress. Synthetic rubber was manufactured in a bottle in just 60 seconds and a polyurethane foam plastic cake "baked" itself in only two minutes.

The revolutionary field of computer technology was dramatized by the "talking computer," a device which verbally releases data by human voice simulation. Electronic voice synthesizers are expanding into educational, commercial and industrial fields.

Other demonstrations in the Previews show included the use of gyroscopes in modern navigation systems for space vehicles, aircraft and submarines and an explanation of how a gas turbine engine operates.

The Previews team that appeared here is one of eight units now touring the country. Previews of Progress lecturers visit some 2,500 schools annually with audiences ranging in size from groups of 100 to crowds of 6,000 or more. About two million students and adults will see Previews this year.

MOON ROVER - This model of an unmanned lunar roving vehicle shows one method of harnessing the tremendous energy in sunlight. Photovoltaic cells on the 15 inch model convert the light from a 300 watt light bulb into electrical energy. Timmy Garrett, 8th grade student at Appomattox Middle School, demonstrates solar powered "moon rover" to fellow students at AMS during GM's science assembly "Previews of Progress" Tuesday, November 29th at 2 p.m.



If you're single, widowed or divorced and tired of being singled out for tax discrimination, join COST (Committee of Single Taxpayers), 1628 21st St. N.W., Washington, D.C. 20009. For any contribution of $10 or more you can help in the fight against tax laws which penalize by levying up to 20 percent higher taxes on a single person than on a married couple who can file jointly on one income.
